MariaDB Software License Terms

These MariaDB Software License Terms (“**Terms**”) govern the Customer’s use of the MariaDB software, including updates and new versions (the “**Software**”), and its written technical information (“**Documentation**”), provided by the MariaDB entity that is party to the Agreement (“**MariaDB**”), whose affiliates may also enforce these Terms. Using the Software or Documentation, or obtaining or using a License Key (defined in Section 9), constitutes agreement to these Terms. These Terms supplement any written agreement or Order Form between the parties (the “**Agreement**”). If no Agreement is in effect, the online MariaDB Subscription Agreement (https://mariadb.com/terms) serves as the Agreement and the Customer is the holder of the MariaDB account (**MariaDB ID**) used to obtain the Software or License Key. Undefined capitalized terms have the meanings in the Agreement.

1. **License Grant**. Subject to the Customer’s payment of applicable fees under the Agreement, MariaDB grants the Customer a personal, limited, non-exclusive, non-transferable, non-sublicensable, worldwide, and revocable license to use the Software for the Customer’s internal business purposes and the Documentation to support that use.

2. **License Restrictions**. The Customer may use the Software only during the applicable subscription term (“**Subscription Term**”), and only in combination with MariaDB products or services for which the Customer holds an active subscription. For Software MariaDB provides for trial or evaluation, the trial period MariaDB designates is the Subscription Term, and no fees or active subscription are required during it unless an Order Form states otherwise. The Customer must not:

(1) transfer, assign, resell, distribute, rent, lease, lend, or sublicense the Software or its rights unless the Agreement expressly authorizes it (any attempt to do so is void);

(2) exceed any limitations (e.g., quantities) prescribed by or agreed with MariaDB;

(3) use the Software to perform services for third parties (e.g., managed services, hosting, time-sharing, or service bureau operations) unless the Agreement expressly authorizes it;

(4) use the Software to develop competing products or services;

(5) use the Software in any hazardous environment requiring fail-safe performance where failure could cause death, personal injury, or severe damage;

(6) remove, conceal, or alter any proprietary or intellectual property notices in the Software or Documentation;

(7) copy (except as necessary for licensed use or backups), decrypt, decompile, reverse engineer, disassemble, or reduce to human-readable form the Software, or derive or attempt to derive the Software’s source code, algorithms, or methods, except as expressly permitted by applicable law;

(8) modify, adapt, or create derivative works of the Software;

(9) circumvent, disable, alter, or interfere with any License Key, license check, or transmission of the Licensing Data (except as Section 9.4 permits), or use a License Key that MariaDB did not issue to the Customer; or

(10) assist or encourage any third party to do any of the above.

3. **Proprietary Rights and Notices**. MariaDB retains all worldwide rights, title, and interest (including intellectual property rights) in the Software and Documentation. The Software is MariaDB’s property, trade secret, and Confidential Information unless MariaDB makes it publicly available without confidentiality obligations. The Customer acquires no rights beyond those expressly granted in these Terms. The Customer must reproduce all original copyright and proprietary notices on any copies of the Software.

4. **Audit and Unauthorized Use**. The Customer’s use of the Software is subject to the Agreement’s audit provisions. Unauthorized use of the Software is a material breach of these Terms. Upon notice, the Customer must promptly pay for any unauthorized use at MariaDB’s then-current standard list prices (disregarding any previously negotiated discounts). A breach of the license restrictions causes irreparable harm to MariaDB, entitling it to seek immediate injunctive relief, without posting bond, alongside other available remedies.

5. **Benchmarks**. The Customer must not disclose any Software benchmark, comparative test, or evaluation ("**Benchmark**") to a third party without MariaDB's prior written approval. Any approved Benchmark disclosure must accurately detail the testing environment and methodology, as MariaDB requires.

6. **Term and Termination**. When the Subscription Term ends, the Customer must immediately stop using and, within ten (10) business days, destroy all copies of the Software, Documentation, and License Keys in its possession or control. The Customer may retain offline routine system backups, subject to confidentiality obligations, but must not restore or use them. Upon MariaDB's request, an officer of the Customer must certify this destruction in writing. Sections 2 to 7, 8.3 to 8.6, and 9, and all warranty disclaimers and liability limitations, survive.

7. **Miscellaneous**. These Terms do not alter the license terms of any free and open-source software (FOSS) or software subject to the Business Source License (BSL). Except as stated in Sections 8 and 9.6, the Agreement prevails over these Terms in any conflict. If any part of these Terms is unenforceable, the rest stays in effect. Except as expressly stated, these Terms and the Agreement constitute the entire agreement between the parties regarding the Software and Documentation licenses.

8. **Special Terms for Free Tools**.

8.1 **Scope**. MariaDB may designate certain Software as a free tool, which is not trial software and does not require an active subscription (each, a "**Free Tool**"). For the Free Tools, except for FOSS and BSL software, this Section 8 prevails over any conflicting provision of these Terms or the Agreement. Software that MariaDB identifies as an enterprise tool requires an active subscription and is not subject to this Section 8.

8.2 **License Grant, Access, and Restrictions**. The Customer may use the Free Tool for internal business purposes or for non-commercial personal, educational, or academic purposes. The Customer may allow its authorized contractors to use the Free Tool on the Customer's behalf, provided the Customer remains responsible for their compliance. The Customer must not use the Free Tool if it is, or acts for, a competitor of MariaDB or its affiliates. The Customer must comply with all import, export, and sanctions laws and the Agreement's trade control terms, and not export the Free Tool to embargoed countries or sanctioned parties.

8.3 **DISCLAIMERS AND EXCLUDED PROTECTIONS**. TO THE EXTENT PERMITTED BY LAW, THE FREE TOOL IS PROVIDED "AS IS" AND MARIADB DISCLAIMS ALL WARRANTIES, INCLUDING THAT THE FREE TOOL WILL OPERATE UNINTERRUPTED OR THAT DATA WILL NOT BE LOST, DELAYED, OR CORRUPTED. THE FREE TOOL IS EXCLUDED FROM MARIADB'S SUPPORT POLICY; MARIADB WILL NOT PROVIDE SUPPORT, MAINTENANCE, BUG FIXES, OR SERVICE LEVEL AGREEMENTS. THE CUSTOMER ASSUMES ALL RISK OF USE AND MUST MAINTAIN RESTORABLE BACKUPS OF ALL DATA BEFORE USE.

8.4 **LIMITATION OF LIABILITY AND INDEMNIFICATION**. TO THE EXTENT PERMITTED BY LAW, THE MAXIMUM AGGREGATE LIABILITY OF MARIADB AND ITS AFFILIATES REGARDING THE FREE TOOL IS US$5.00. MARIADB AND ITS AFFILIATES ARE NOT LIABLE FOR ANY INDIRECT, INCIDENTAL, SPECIAL, CONSEQUENTIAL, OR PUNITIVE DAMAGES, OR FOR LOST PROFITS, REVENUE, DATA, OR BUSINESS INTERRUPTION. THE CUSTOMER MUST DEFEND AND INDEMNIFY MARIADB AND ITS AFFILIATES AGAINST ANY THIRD-PARTY CLAIMS OR COSTS ARISING FROM THE CUSTOMER'S USE OF THE FREE TOOL, INCLUDING UNAUTHORIZED DATA ACCESS, MIGRATION, OR EXPORT VIOLATIONS.

8.5 **Telemetry, Third-Party Components, and Feedback**. The Customer consents to the Free Tool automatically collecting and transmitting diagnostic and usage telemetry to MariaDB. The Customer must not include Confidential Information or personal data in open configuration fields or resource identifiers. The Free Tool may contain third-party components subject to separate licenses. The Customer irrevocably assigns to MariaDB all rights in any Free Tool-related feedback.

8.6 **Revocation and Termination**. MariaDB may modify, limit, or revoke the Free Tool license or access at any time, without notice. Upon termination or revocation, the Customer must immediately stop using the Free Tool and destroy all copies in its possession or control.

9. **License Keys and Licensing Data**.

9.1 **Definitions**. "**License Key**" means any key, token, license file, or other credential that MariaDB issues to enable, verify, or limit use of the Software. "**Licensing Data**" means information about the License Keys and the Customer's deployment and use of the Software, including license, contract, host, instance, and network identifiers (including IP addresses), product versions, features used, resource quantities (e.g., Servers, Instances, Cores,

vCPUs, and memory), and timestamps, but not the content of the Customer's databases. "**License Grace Period**" means the period, which may be zero, after a License Key expires during which the Software continues to run, as MariaDB sets in the License Key or the Software unless agreed otherwise under Section 9.6.

9.2 **License Key Validity**. The Customer must not use Software requiring a License Key without a valid License Key issued by MariaDB. The Software checks the License Key locally and may display warnings before and after it expires. The Software may refuse to start or restart, run with reduced functionality, or stop if: (a) the License Key has expired and the License Grace Period has ended; (b) the License Key is missing, invalid, altered, revoked, or does not cover the Software; or (c) the host's system time is inaccurate. The License Grace Period does not extend the Subscription Term or the Customer's license. Unless agreed otherwise under Section 9.6, use during the License Grace Period is unauthorized use under Section 4 unless the Customer pays for a Subscription Term that covers it.

9.3 **Customer Responsibilities**. The License Keys are MariaDB's property, trade secrets, and Confidential Information. The Customer must keep them confidential without time limit and share them only with its personnel and contractors who use the Software for the Customer as the Agreement permits, or as needed to deploy them under this Section 9.3. The Customer must also: (a) promptly check each License Key and notify MariaDB of any error, loss, or unauthorized disclosure; (b) order renewals and install each renewed License Key before the current one expires, and each replacement within thirty (30) days after MariaDB makes it available; (c) keep system time accurate on hosts running the Software; and (d) monitor the Software's license notices. MariaDB may replace the License Keys at any time, and may revoke or block any License Key that is disclosed, copied, or used without authorization, or when the Agreement or relevant Order Form ends or is wholly or partly suspended. If the Agreement authorizes the Customer to distribute or embed the Software, the Customer must deploy valid License Keys and is responsible for any effect of their expiration on its end users.

9.4 **Licensing Data**. The Customer consents to the Software collecting the Licensing Data and sending it to MariaDB. The Customer may stop transmitting Licensing Data only for: (a) telemetry that MariaDB designates as optional; and (b) deployments that MariaDB authorizes in writing for offline use. For offline deployments, the Customer must give MariaDB, on request (no more than quarterly), a written report of its Software deployments and quantities, signed by an officer of the Customer certifying, after reasonable inquiry, that it is accurate. Unless MariaDB notifies the Customer otherwise in advance, a failed transmission alone will not stop the Software. MariaDB may use the Licensing Data to: (i) verify License Keys and the Customer's compliance with these Terms and the Agreement, including quantities used; (ii) invoice excess usage; (iii) operate, support, secure, and improve its products and services; and (iv) manage the Customer's account. Licensing Data is evidence of the quantities used unless the Customer proves otherwise. MariaDB will disclose the Licensing Data that identifies the Customer only to its affiliates, service providers, and professional advisors, to the authorized partner and any distributor through which the Customer purchased, to enforce its rights, or as required by law. This limit does not apply to aggregated or de-identified Licensing Data. MariaDB processes any personal data in the Licensing Data as an independent controller under its privacy policy. The Customer is responsible for any Confidential Information or personal data it places in host names or other identifiers that the Software transmits.

9.5 **Remedies and Liability**. If the License Key does not reflect the Customer's current entitlements or the License Grace Period, MariaDB will promptly issue a corrected or temporary License Key after the Customer notifies MariaDB. This is MariaDB's sole obligation and the Customer's exclusive remedy. MariaDB may issue temporary, emergency, or extended License Keys, or extend the License Grace Period, without extending the Subscription Term or waiving any right. TO THE EXTENT PERMITTED BY LAW, MARIADB IS NOT LIABLE FOR ANY INTERRUPTION, DOWNTIME, DATA UNAVAILABILITY, OR OTHER LOSS ARISING FROM THE SOFTWARE OPERATING AS DESCRIBED IN THIS SECTION 9. Except as described in this Section 9, MariaDB will not remotely disable the Software.

9.6 **Precedence**. This Section 9 prevails over any conflicting provision of the Agreement, including provisions on disabling code or similar mechanisms, data collection, or the exclusion of online or click-through terms, except a provision in a written agreement, amendment, or Order Form, each signed by MariaDB, that expressly excludes or modifies this Section 9 or the use of the License Keys. Statements by MariaDB personnel or partners do not modify or waive this Section 9. The Software operating as described in this Section 9, including when a License Key expires or the License Grace Period ends, is not disabling code, an automatic shutdown, a lockout, a time bomb, electronic self-help, or any similar mechanism.
